ADULTS, 35c.

CHILDREN, 20c.

Clareholm's most popular House of Entertainment.

THE CHAUTAUGUA

The first summer Chautauqua held in Clareholm, has come and gone, and everyone who attended its session has formed some impression as to its value to the community. On Thursday night the audience of over one thousand was asked if it wished the Chautauqua to return next year, and less than fifty kept their seats. It would appear, consequently, that while some few have been free in their criticism that the majority of those who attended as season ticket holders, were well satisfied that they received good value for their money. Indeed, it would have been pretty poor had it not been worth 21 cents per session.

From the standpoint of the season ticket holder it was a good thing. It furnished a week of amusement, recreation, social and intellectual profit. Providing that the program is always kept up to a high standard, Chautauqua should be of incalculable benefit to all who attend. Hampered by no religious or class differences, it brings together all classes, and shows what might be accomplished all the time if we only had sense enough to sink our church differences and unite our efforts for the common good.

The program, we believe, was not as good as it ought to have been, which fact we can excuse this year. The Filkins Concert Company was the best musical treat presented. The lectures, save one, were all good, and were well received. The speakers were excellent, but would have appeared to better advantage had there been a little music in their program.

The Whiteplains Concert Orchestra was good, but appeared a little cheap owing to the nature of the program and conductor. Miss Olive McCormick, soprano, captivated her audience with her sweet voice and simplicity of manner, and would always be welcomed back.

The Ladies' Orchestra was not quite up to expectations, and corrections would not compare with the ladies' orchestra that appeared here in the fall festival.

Yet after all, Chautauqua is coming again, and we were pleased to attach our name together with 23 others as sponsors for next year. We believe the Chautauqua should be made an annual event in Clareholm. It brings money to the business men. No such crowds were ever before seen in Clareholm. It will give Clareholm a name and standing among the best towns in Alberta.

Why criticize the men who guaranteed the play? These same men are among the very first to assist in any thing for the public good. What they did, and it meant a lot of work to some of the ladies did not only for the good of the community, and to make it a better place in which to live. The value of the town is some when the value of a town is not determined solely by the quality of its sidewalks and roads and public utilities. The opportunities afforded for the intellectual enjoyment, for education and for moral uplift are important factors, and are probably the most valuable of the town's assets. Cut out our churches and schools and such educational institutions as the Chautauqua and moving picture theatres and Clareholm would be one of the most unattractive towns on the prairie.

Financially, the Chautauqua was a success. The committee, after paying expenses, will have about \$100 to the good. This, with the surplus of last fall, gives the committee about \$200 as a reserve fund.

Next year better seating accommodation will be provided and other improvements are planned. Only 500 season tickets will be offered for sale so that it is not likely that there will be much difficulty in disposing of them. The late committee wish to thank everyone for their cooperation in making the Chautauqua this year a success and trusts that next year's will be even more successful owing to a great measure to the cooperation of all classes of the community.

Senator Robertson is proving himself a successful negotiator in labor troubles. He settled the trouble among the shipbuilders at Vancouver, he adjusted the big Winnipeg strike, and also put the kibosh on the threatened strike at Fort William. Such a man should be the labor minister in the Government. Men Crothers never did amount to anything in a labor dispute, and he should be replaced by Robertson. The position of labor minister is no stick figure, and calls for the services of a man. Crothers is the poorest man that ever has been on the job since the portfolio was established.

Each province in the Dominion has been asked to form a scheme of rationing for its own people. Thus the Canada Food Board hopes to provide for each Province's own particular conditions.

DIED AT VANCOUVER

Mr. R. A. Fisher, who about a year ago conducted the Clareholm Meat Market, died at Vancouver on Tuesday, June 19th.

Mr. Fisher was one of the earliest settlers in Clareholm. Fourteen years ago he was in the general store business where W. Annabie now stands, and later conducted a furniture business in the building now occupied by the drug store. After selling out his interests in Alberta he removed to Vancouver, and for many years was engaged in various business enterprises there. Two years ago he opened up the Clareholm meat market, and farmed the old Wilhoite farm near town.

Mr. and Mrs. Fisher returned to their home in Vancouver this spring after Mr. Fisher had been under the doctor's care in Rochester.

Mr. Fisher's many friends in Clareholm will be surprised to hear of his death, as his throat trouble was not known to be dangerous.

The sympathy of the community will go out to Mrs. Fisher in her bereavement.

OUR NEW OPERA HOUSE

The new Rex Theatre is nearing completion, and will have a grand opening on Friday, June 28th.

The new building is a great credit to the town and will be a source of pride to our citizens. It is expected to have been spared to make the opera house complete in every detail. It contains all modern conveniences, which will no doubt be appreciated by the show companies who come to town.

Mr. Milnes has done his best to give us an opera house worthy of the town, and it is now up to the citizens to prove that they are worthy of the opera house. It represents a large outlay of capital, and will need steady patronage to pay interest on investment, taxes, insurance, etc.

Travelers and showmen who have inspected the new house will find that there are few play houses in Alberta that can compare with it. The Rex Theatre and the Allen Theatre, of Calgary are larger, and cost more money, but neither of them are more comfortable for patrons. We believe there is no other town in the whole of Canada, the size of Clareholm, that can show a finer play house.

Manager Edlund assures us that the play for the opening night will be the very best he can procure. In addition to the screen play there will be selections by local talent, singing, instrumental, etc., and with the work of the orchestra, which will be provided for the occasion.

Due credit will be given of the program for the opening night. It is to be hoped the opera house will be filled to capacity on this auspicious occasion. We are entering into a new era in the art of entertaining in Clareholm.

AN ALBERTA ENTERPRISE OF NATIONAL IMPORTANCE

The six thousand barrel mill of the Alberta Flour Mills, Ltd., is rapidly taking on the appearance of a definite structure. The progress of the construction work is going ahead rapidly with a gang of from one hundred to one hundred and twenty-five men, aided by the most modern appliances for making the work forward with the speed commensurate with first-class, high grade work, under the management of Mr. Alex. Ingersoll, chief engineer, who is a veteran flour mill builder. The construction of this mill at Calgary means more than a local enterprise, and is recognized by the Canadian authorities as of national importance, as at present every hundred pounds of wheat ground in Canada means sending overseas 74 lbs. of flour; means the saving of 28 lbs. of mill feed here, and more important a saving of 28 per cent of shipping space, which, calculated on the output of this mill, means several ships saved for other purposes.

The location of this mill at Calgary will release for use in Alberta, 60,000 to 75,000 tons of mill feed, available for the farmers of this province, the value of which is becoming more and more apparent every day. There is no doubt as to the profits in the flour mill business in Canada; as a careful perusal of the financial reports of any of the large Canadian flour mills will show. The United States mills, will show the wonderful progress of the institutions, and with this mill located right where the best in the world is produced, and in sufficient quantities to supply several mills of this size, there is no doubt of the success of this enterprise. And the fact that nearly 90 per cent of the total output of the mill will come from the farmers of Alberta, means that the profits and the by-products will be available for the producers of the wheat, that the flour is made from, which is as it should be.

Every man is wanted on the farm this year who ever handled a hoe, or drove a team. Get in touch with the situation. Find out who is handling the employment agency in your town. Sign up for service where you will count most during this harvest.

CONSERVING MOISTURE FOR 1918 CROP

(Experimental Farm Note.)
Moisture is one of the controlling factors in crop production in the Prairie Provinces.
Three methods of conserving moisture are:
First, to have the ground in such a condition that the rainfall will soak down and not run off.
Second, to keep the surface of the soil sufficiently fine and loose that the upward movement of the water is checked two or three inches from the surface and held there.
The third method of conserving

moisture is to destroy all weed plants on cultivated ground.
Most farmers summer-fall a part of their farm with two objects in view: to store up moisture and destroy the weeds. Experiments on the Scott Station have shown that early ploughed summer-fallow will store up more moisture and give heavier crops the succeeding year than late ploughed fallows. Ploughing the middle of May has given 3.5 bushels of wheat per acre more than ploughing in late June ploughing has given 2.5 bushels more than July ploughing. This increased yield from early ploughing is due not only to storing more moisture but to less loss of

moisture from weed plants, that grow up on the late fallows.
It is sometimes thought that ploughing down a crop of weeds will have material benefits. Experiments conducted have shown that there is not only a loss of moisture due to the weeds using it, but it is difficult to cover the weeds and make them decay in a reasonable time. Thus, too, the ground is left in a more open condition than the fallow. Experiments at the Scott Station have shown that ploughing green crops such as peas and vetches does give as good returns as does incorporating barnyard manure into the soil.

Early ploughed summer-fallows, well cultivated with the duckfoot cultivator will show an increase in yield and the frequency with which the land is summer-fallowed and the number of weeds present will be determining factors in regulating the amount of cultivation necessary.
It might be pointed out that from summer-fallowing alternate years is practiced and there is a reasonable amount of moisture the land will not stand the same amount of cultivation as it will that is only summer-fallowed once in three or four years. Especially is this true in the north-west where early autumn frosts prevail.

CANADA FOOD BOARD EDUCATIONAL DIVISION

The farmers of Canada will very shortly have to undertake the harvest work with the help of green labor. In this connection they should remember that we are at war. They should adjust the farm to suit the new conditions and they should begin right in their own minds.

The first adjustment necessary is to change the point of view from one of criticism, discouragement and fault-finding with labor conditions to that of the soldier and war-worker, and realize that we are going through a crisis, the most serious the world has ever witnessed without any exaggeration whatsoever.

There used to be talk among farmers derogatory to the city man and that inexperienced laborer, who sometimes sought employment temporarily on the farm. Such talk is out of place now, with the Germans sixty miles from Paris and every available man in Britain and France fighting to save not only his own country but this country as well. The Canadian farmers forget that they themselves have been farmers all their lives and in war time they can't expect to secure men volunteered from the cities with an experience in farm work equal to their own. That is an impossibility. But it is not impossible that farm production of this country be increased despite the shortage of experienced labor. That is true is proven by the experience of this country in the manufacture of munitions.

When the war started Canada was absolutely inexperienced, unskilled in, and without the machinery for, the manufacture of munitions. But the manufacturers got to work. They studied the problem and they solved it.

Today Canada is turning out millions of dollars worth of shells every month from the largest to the smallest, and the most minute mechanical contrivances in connection with fuses and time charges. Canada's record in the manufacture of munitions is one of the surprises of the war. It was not made by Canada saying "Canada Can't", but by adopting the motto "Canada Can." Canada did not refuse to try because of the scarcity of labor, but set to work to organize, and employed men and girls who had never been inside a factory before. They accomplished the impossible. These inexperienced helpers were speedily taught their parts and the result is shown in the products of munitions from Canadian factories now known all over the world, not excepting Germany.

If the Canadian farmer makes up his mind that there are war times and war measures are necessary there is absolutely no doubt he can utilize to a tremendous advantage the man power and the woman power of the towns, where people are only too willing to go to his assistance if they are organized to do so. It has taken him a life-time to acquire his information. Townspeople have spent their lives at different work, but with his knowledge of farming and his intimate acquaintance with his farm and all its needs he should have the ability to organize inexperienced help and show each helper his or her particular job and how best to accomplish it. A few hours patient teaching in any one particular line of work will very soon enable a greenhorn to "carry on" as they say in the army. By assistance and consideration the farmers of Canada can, without question, effect an organization from green labor willing help from town that will not only surmount themselves but will also be of tremendous benefit to the Empire by the increased results of their team.

ALBERTA FIGHTING PARSON IS NAMED WHITTY CHAPLAIN
Rev. Sydney Lambert, Formerly of Parkland, Given Rank of Chaplain

Toronto, June 13.—Sydney Lambert, pastor of the Methodist church at Parkland, Alta., the "fighting parson," the first combatant minister of the Canadian army to fight in the trenches and who lost his left leg at St. Eloi, has been appointed chaplain at Whitty military hospital, with the rank of captain.
Rev. Lambert left his church in November, 1915, and went with the men of his congregation with the 60th Calgary Battalion overseas. An explosive bullet shattered his leg.

DOMINION OF CANADA CANADA REGISTRATION BOARD

NOTICE

NOTICE IS HEREBY GIVEN that the places mentioned below have been fixed as places of Registration for the Towns of Clareholm on Saturday, June 22nd, from 7 a.m. to 10 p.m.

**We are making Money!
Do You Want to Make Money?
You Can Make It With Us**

In the past 90 days we have completed three producing oil wells in Paola, Kansas, each having an estimated production of forty barrels per day. These wells are now being connected with the Prairie Pipe Line, and within a few days the profits from the wells will be rolling into our treasury at the rate of \$2.50 per barrel.

We have fourteen other drilling cites on this forty acre lease, where our first wells are situated. Fourteen more producing wells is the inevitable result.

In addition to this first forty in Paola, we have 134 acres just south of the original holdings which is considered a "sure pop", sixty acres in the great garnett fields of Kansas, completely surrounded by producing wells, and hundreds of acres in seven wonderful Wyoming fields. Hundreds of wells are possible.

This is not a speculation—we have the goods. We pay dividends now and will be able to pay more as soon as we can develop our property.

Kindly send me information about the Wyoming-Kansas Petroleum and Refining Company. It is understood that in asking for this information I am not obliging myself to you in any way.

Name

Address

HERE IS THE DAY YOU REGISTER

ON June 22nd, Saturday, every man and woman, resident in Canada, who is 16 years and over, must attend at one of the

places provided for registration, between the hours of 7 a.m. and 10 p.m., and there truthfully answer all the questions set forth upon the registration card. Upon signing the card, vouching for the accuracy of the answers, the man or woman will receive a Registration Certificate, as shown below, which must be carried upon the person thereafter.

Why the Certificate is so Important

For failure to register a maximum fine of \$100 and one month's imprisonment is provided, also an added penalty of \$10 for each day the person remains unregistered after June 22nd.

Persons remaining unregistered cannot lawfully be employed, and cannot draw wages for work done after June 22nd. Employers who keep unregistered persons in their employ will be liable for fines equal in amount to those recoverable from the unregistered employees.

Unregistered persons cannot lawfully purchase transportation tickets, and may find themselves

REGISTRATION IS LAW

Don't Fail to Register.

This Certificate is YOUR Protection. Get it and Carry it

barred from travelling on railroads, steamboats, etc. Similarly they may be denied board and lodging at any hotel, restaurant, public house or boarding house. In a word—all persons remaining unregistered, and all persons having dealings with unregistered persons, bearing them to be such, incur heavy penalties under the law.

Farm Boys' Camp

Have Been Very Successful During the Last Two Years

One of the outstanding features of agricultural education in Western Canada is the Farm Boys' Camp, which will again be conducted in connection with the Saskatchewan Provincial Exhibition, Regina, in July. These camps have been very successful during the last two years, and this year's is intended to be on a larger scale than in previous years. The camp is somewhat similar to those conducted in connection with the state fairs of the United States, with, perhaps, this difference. The camp at Regina will be conducted more along the lines of an educational institution, being virtually a short course in agriculture and animal husbandry for farm boys under the direction of the provincial department of agriculture, and is not to be looked upon as an outing and a reward for accomplishments on the farms. It is felt, however, that unless boys have in some way qualified for a place in the camp, they will not fully appreciate its advantages, and hence will not receive the full benefit of the training. The associations have, therefore, been asked that in choosing their terms, preference be given to those boys who have won prizes in call, cobb or other competitions.

Teams of five boys each will be chosen to represent the various agricultural associations throughout the province, and it is expected that at least 500 boys will attend the camp this year.

Higher Heights to Climb

We are only beginning to realize the danger confronting us, only beginning to understand the full measure of the task laid upon our people. Save and serve, work and serve. It is but for a little while in the life of the individual, as a moment in the life of a nation, but it is a little while in which all our energies, all our means must be bent to a single purpose. Canada has played a noble part during nearly four years but there remain yet higher heights to climb—Montreal Gazette.

Minard's Liniment Cures Disemper.

Why the shortage of tonnage forces the allies in Europe to rely on this contest for food may be explained by the fact that while 5,000 tons of food from here to Europe, 10,000 tons of shipping would be required to move the tonnage from Argentina and 15,000 from the United States. The longer haul would require two and three times as much tonnage. By our self-interest in export foods we are solving the submarine menace. — Toronto Mail and Empire.

"A Decent Form of Polygamy"
The question of allowing Germany to have several wives must be considered very seriously as it is the only remedy for the shortage of German fathers. Germany has lost a considerable portion of its noblest manhood. This is a patriotic idea. A decent form must be found for this kind of polygamy, which is the only way of combating the birth-rate reduction. — Politisch-Anthropologische-Monatschrift, Berlin, last week in February.

Minard's Liniment Co., Limited.

Dear Sirs,—This fall I got thrown on a fence and hurt my chest very bad so I could not work and it hurt me to breathe. I tried all kinds of Liniment and they did me no good. One bottle of MINARD'S LINIMENT, warmed on blanket and applied on my breast, cured me completely.

Rosaway, Digby Co., N.S.

How to Make Potato Butter

Potato butter is recommended by the British ministry of food as a cheap substitute for butter, being made in England at a cost of less than 10 cents per pound, as follows: Peel the potatoes and boil until they fall to pieces and become fluffy. Then rub through a fine sieve into a warm bowl. Add 1/2 cup of oil and 2 ounces of butter or margarine and 1 teaspoonful of salt. Stir until smooth and then mold into rolls and keep in a cool place. To make the appearance acceptable use butter coloring, and if intended to keep beyond a few days, a better preservation should be added.

Doukhobors to Stay

Verigin Closes Deal for 16,000 Acres of Prairie Land

Peter Verigin, leader of the Doukhobor colonies in Western Canada, has just consummated a deal for 16,000 acres of prairie land near Killarney and the payments for the land extend over a period of 10 years. Mr. Verigin has given his pledge that he will not in any case return to Russia within that period of time.

"This proves," he said, "that our people are not planning to return to Russia. Our religion prohibits us from fighting, but we are doing everything in our power to aid the war from a standpoint of production. We have taken on oath of fidelity to the British crown; our beliefs forbid us to bear allegiance to any king but Jesus Christ."

Rules Is Rules

"What are the dining hours at your club?"
"From 5 to 8 for all except the committee."

"Why the exception?"
"Because rule 5 says: 'The committee may be excused from the duty to fill any vacancy in their place.'"

A Boon for the Bilious.—The liver is a very sensitive organ and easily deranged. When this occurs there is undue secretion of bile and the acid in the liver becomes too strong. It is a most distressing ailment, and many are prone to it. In this connection a man finds the best remedy in Parmentier's Vegetable Compound, which is a powerful and perfectly correct the disorder. There is no other medicine in the entire list of pill preparations.

A Mental Error

Where the Passenger Was When He Wasn't

A well-known provincial paper in England makes itself responsible for the following story, concerning them. The tramcar was hopelessly overcrowded, and when the car had achieved the upper deck, were transgressing all regulations by standing. They were all to be seated, the conductor with emphasis, "you can't stand on top!"

"Well," said one literalist, smiling broadly as he stepped down, "I was standing, whether we can or not." The girl answered nothing, but promptly pressed a button. The car stopped, and she stepped down. She voluntarily took a seat on the floor. In the car, she appeared to be in complete control, getting the barrier in a famous play, "you will not stand on top!"

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Canadian Captain Foils Hun

Captured by Submarine He Knocks German Down and Dives

A solid British fist and the opportune arrival of an allied destroyer saved Capt. D. J. McDonald, skipper of the three-masted schooner John A. Walter, now at the bottom of the Atlantic, from being carried a prisoner in a submarine to Germany.

Captain McDonald told the story on his arrival on a 5 American steamship. The U-boat had been captured into the schooner, on her way from a Canadian port to Europe. The submarine commander had ordered Capt. McDonald, whose house is in Prince Edward Island, into the German craft. While some of the German crew had been taken aboard the schooner, arranging to transfer stores needed by the U-boat, the two captains stood in the unloved, conning tower as spectators.

"I'm going to take you to Germany for a spell and see how you like it," the German commander informed the British.

"Are you a quack?" Captain McDonald, whooping he swung his fist to the German's jaw and, as the U-boat commander fell backward, McDonald climbed out of the tower and dived into the sea. He swam deep to avoid being shot.

There was wreckage floating and good fortune brought McDonald to the surface behind it, so that he was hidden from the sight of the enraged submarine crew.

During their search for him a destroyer dove in sight and the Germans had to abandon the schooner and the U-boat.

Minard's Liniment Cures Garget in Cows

An Informal Visit

A number of the American Lafayette squadron had to make a precipitate landing in the desert, not enough to come down at a British aerodrome behind the lines, but, however, without mixing up things a bit.

After receding himself from the tangle of wires he limped slowly up to "base" and was met by a British officer.

"Are you the big noise of this joint?" he asked.

"I am the commanding officer. If that has anything to do with it, I'm just right."

"Well," said the American, "I just looked in to tell you I have spotted the retinal tank on your grass plot."

A True Patriot

"Why don't you get an alienist to examine your soul?"
"No, sir. An American doctor is good enough for me." — Baltimore American.

Britain's Economic Strength

The wonderful economic strength and endurance of Britain is strikingly illustrated by the fact that after nearly four years of the fiercest war she is, as Mr. Bonar Law pointed out, "in a position to face the new budget, self-supporting." "It is only necessary for us to lean on the United States to the amount the other allies lean on us," he said. "In other words, we are self-supporting." This amazing financial strength of Britain is due to the allies the difference between victory and defeat. So well is she able to carry the burden of the war that now, with the United States assisting towards the financial maintenance of the other allies, the British government is for the present assuring payments from her own resources of the debts of the Dominions and India, and to meet more than four thousand six hundred million of the New Britain-Borrowers' good reason to rage at the end of July, 1914, when he found that Germany must fight Britain. — Ottawa Journal.

A GRAMMIDINE FOR LITTLE ONES

Baby's Own Tablets are a grand medicine for little ones. They are a laxative, but through in action, and never fail to regulate the bowels, soothe the stomach and make baby comfortable and happy. Concerning them, Mrs. Francis Fournier, Toronto, writes: "I have used Baby's Own Tablets for my baby and would recommend them to all mothers. They never fail to benefit the little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Eat More Vegetables

There are plenty of potatoes, carrots, turnips and cabbages in Canada from last year. "Eat them up," says the Canada food board. "Do not waste one of them. Eating vegetables is good for what ails you, and that they want over there."

NO HUMBUG ABOUT THIS CORN REMEDY!

Will it cure quickly—you bet it will! It cures corns on the roots in a hurry. Putnam's Extract is painless. You point a few drops on the corn, and presto, the pain disappears instantly. Putnam's dissolves a sore corn, and makes it shrivel up and drop out by the roots. Putnam's is a real cure, one can depend on, and costs but a quarter in any drug store. Why pay more for something not so good as many drugs.

Dog Meat for British Urged

Lord Cland Hamilton Suggests All "Toy" Animals Be Killed and Eaten

Lord Cland Hamilton suggested recently in England that all toy dogs be killed and eaten. The idea of having seen a woman dressed in fur standing in a queue at a butcher's, while she held five ribbons of different colors to which were attached as many dogs.

All the "dogs" folk immediately protested against his suggestion, but he calmly replied through the medium of the press that the consumption of the dogs would help the food shortage, on the one hand by providing a supply of edible food and on the other by saving the amount of food consumed by the animals.

This is only one of several suggestions made in Britain in the interest of food economy, but the agitation has not met with much support. The dog defenders have a large following.

Lady Algernon, Gordon-Lennox writes to the press asking permission to bring to the notice of the public the formation of a British dog-eating association. In her letter she says:

"It has recently been demonstrated beyond a shadow of doubt that an exceptionally high class of wool can be spun from the combings of the heads of the dogs of the breed of dachshund and sheepdogs have been submitted to wool experts and are emphatic in their commendation."

Planning to Speed Up War Work

An official statement with reference to the recent war conference held at Delhi, India, states that the Government has adopted important recommendations on questions of man power and the development of the country's resources. Approval was voted on a continuance of energetic action on a voluntary basis and also the constitution of provincial committees to co-operate with the national board and other authorities in various ways, including the immediate development of ship-building program.

Hubby's Memory

A man — says forgets the letter he wife gave him to mail when he left the house. But he no. — The quarter he gave her for spending money when he left the house. — Cincinnati Enquirer.

M. D. Dyspepsia Cure

Have Sloan's Liniment for the sufferer from severe indigestion and constipation can cure themselves by taking fifteen to thirty drops of Extract of Roots after each meal and at bedtime. This remedy is known as Hether's Edger's Curative Syrup in the drug trade. Get the genuine. 50c. and \$1.00 Bottles.

Cat Needed Taming
The handily hustled up to her new lodger as he came down to breakfast the first morning.
"Good morning, sir," she wheezed.
"Good morning," said the lodger. "I hope you've had a good night's rest." "Yes," said the landlady, tossing her head. "I suppose you're going to ask me to have the thing tamed?"
"No, not exactly," said the gentle lodger. "But would you very much mind having it tamed?" — Pittsburgh Chronicle-Telegraph.

Tired out after sewing! What a common experience, whether the work is done by hand or machine. It is not so much on account of the muscular exertion as because of the strain on the eyes.

You feel tired all over, because the nerves are exhausted. The optic nerve, which controls sight, is extremely sensitive, and when in constant use consumes nerve force at a tremendous rate. If the nervous system is not in good, healthy condition this strain is more than you can stand, and you have headaches, and feel all tired out.

Dr. Chase's Nerve Food

50 cents a box—do not pay more—at all dealers or Edmondson, Hale & Co., Ltd., Toronto. On every box of the genuine you will find the portrait and signature of A. W. Chase, M.D., the famous Receipt Book author, 11

HUBS and HORSES

The world is short of horses. To get the most out of your team use

MICA AXLE GREASE

"Use half as much as any other"

The mica flakes fill the pores and crevices in the axle and the grease keeps them there. Mica Grease means fresher horses at the end of the day and longer life for your harness and wagon.

EUREKA HARNESS OIL

"Langhans leather is worst overcome—water and dirt. It makes harness pliable and waterproof, prevents breaking of stitches and imparts that rich black luster to all dark dressed leather."

Sold in standard sized packages by live dealers everywhere.

**PRACTICES THAT WOULD KILL
A NATION (CAN'T CAUSE A
COMMUNITY TO THRIVE)**

(Registered in accordance with the Copyright Act)

We are living in a period of conservation and economy.

Those men and women who hitherto have given but superficial thought to the matter of where they buy their merchandise, will do well to pause and ponder well the situation.

There was as much basic necessity for community loyalty ten or twenty years ago as there is today; but never before were the facts so strongly brought home.

Nowadays, the blood-red lessons being scarred into the very souls of the men and women of many nations is that superficial impressions must be flung aside while we pierce our vision through to ultimate results.

Those of superficial vision can have no place of weight or power during these stirring, strenuous times. When the traditions and ambitions of all nations are seething in the world's terrible crucible they must give place, both at the battlefield and in the legislative halls, to those serious, far-sighted intellects which realize that their country's problems can never be solved by any "dash-in-the-sun" methods.

When a nation's existence is at stake that nation faces its most terrifying crisis, and the most drastic preventatives are imperative.

When a community fails in its duty to itself by a lack of home loyalty, an economic crisis is precipitated that must result in one of two things: immediate reform or ultimate disaster. This is an age of ultimate results, and it is an age of the keenest economy.

Loyalty to home institutions is the keenest economy any community can practice.

The habit of spending home money away from home is false economy and a community disloyalty whose ultimate result is unpleasant to contemplate.

Should a nation practice such a habit it would very shortly be wrecked upon the shoals of industrial ruin. The nation or the community which spends all the money possible at home will stand firm upon the rock of true economy and true patriotism, while others, grasping for some imaginary, immediate saving, will slowly but surely crumble away upon the sands of commercial dissipation.

If you desire a thriving community, you must stick to loyal, thriving methods.

Every person making his living in a community, whether on the farm or in the store, office, workshop or factory, depends for his success upon the success of the community. None of these persons is independent—all are interdependent. If you injure your community you injure yourself.

The business man must realize this just as fully as the farmer or the artisan, and no merchant is true to his community who steps outside for labor or material that can be locally supplied any more than is the person who has developed the metropolitan "catalogue craze."

Days are upon us when people think—are forced to think. Let there be a little more honest thinking along community loyalty lines.

GRAIN GROWERS' SECURITIES

Western Farmers Organization Enters New Field of Activity

The United Grain Growers, under the name of the United Grain Growers' Security Company, are entering into a new field of activity in Western Canada in connection with the sale and appraisal of farm lands. The company will act as a medium through which farms may be bought or sold and will give detailed reports and appraisal on any parcel of land. Further steps are contemplated, however, and when the organization is complete it will have, in addition to the departments referred to, the power to act as financial agent or broker and to handle a general insurance business. Offices have been opened in Winnipeg, Regina and Calgary.

Fraser & Peck have been appointed local representatives of the Company. The company is carrying on an extensive advertising campaign in the United States, and expects to bring in thousands of land buyers. Anyone wishing to dispose of a farm or ranch land would do well to list it with the local representatives.

Your Oil Opportunity in Wyoming

The Oil Industry, especially in Wyoming, has been pioneered by the small investor. The impelling magnitude of the development during the past two years has demanded the attention of every class of people in the United States.

Now there comes daily reports of huge fortunes made in oil over night—and the industry is every day becoming more popular. The chance to get into big companies at their inception and grow rich with them as they develop is still open to those who will act quickly. This truth applies to the Clark Fork Oil Co. to a greater extent than to any other we know of. Our advice is that you should get in now while you can at the present prices. Oil from either one of our holdings will make a fortune for our shareholders.

CLARK FORK OIL COMPANIES

Capital \$250,000—par value 10c.

Head office—Suite 71 Selvidge Bldg., Billings, Mont.

10 C Per Share Today 10 C.
Another Advance Coming Soon

TWO RIGS PURCHASED AND READY TO DRILL

WARM SPRINGS—Now recognized as one of the big producing fields in the State of Wyoming. This structure proved a big surprise to all operators and as a result all of the structure was leased by independent companies. Our lessees here have been prominent to be well within the producing area and had we no other holdings, the investor would be assured of a good run for his money in Warm Springs.

CLARK FORK OIL FIELD—Without doubt one of the coming producers of the Montana-Wyoming territory. Our first well will start here within a few days. This company practically controls all of the dome and in event of oil we will rank as the largest company in the field.

MANDERSON OIL DOME—Recognized as a large oil structure, and only waiting actual developments to prove its worth. We have a good average here and will commence an active drilling campaign as soon as our other fields have been proven.

CARBONADO DOME—A test well will be put down here this summer which will prove our extensive holdings. Oil showings are abundant here according to all expert reports and there is little likelihood of failure.

KANSAS—We have a large acreage here in the heart of the productive region. Production here is practically assured.

**What Will You Do For Help?**

FARM help is scarce, but this condition can be relieved to a marked degree by using machines that accomplish more work in a given time with less man power.

Why should the farmer cling to horses—a slow, expensive means of power—when every other business is adopting the truck and thereby reducing the cost of hauling, speeding up deliveries, and saving for human needs the food that the horses would otherwise consume?

The motor driven truck can work constantly at maximum load under the burning summer sun, or in the coldest weather. Unlike the horse it needs no rests while working, it eats only while in actual use, and when the day's work is done it requires very little attention, and leaves you free for other "chores" about the place. Then, it can be housed in one-quarter the space of the horses, wagon and harness it replaces.

It is a mistaken idea that a truck is useful only for driving upon paved roads. The Ford can be driven all over the farm, and used for hauling grain, potatoes, fruit, roots, fertilizer, wood, stock, milk or any other product. The speed it travels, the time it saves, and its low upkeep cost appeal very strongly to all users of the Ford Truck. If you need help, order your Ford One Ton Truck today.

**The Summer Session
for Teachers**

Arrangements are now practically
complete for the Summer School for
Teachers which will be held this year
as usual at the University of Alberta
in July and August.

The standard courses in agriculture
and gardening, household arts, fine
and applied art, manual arts, first aid
and physical training will be offered
as heretofore.

According to the regulations of the
Department of Education British and
American teachers whose profes-

sional standing is recognized in Alberta
are required to complete courses in
History and civics, School Laws and
Regulations and Geography with spe-
cial reference to Canada, in order to
become fully qualified in the pro-

vince. Instructions in these courses
will be given by C. Sanson, of Cal-
gary Normal School, and Miss Dickie
and W. A. Stickie of Camrose.

Several courses are being offered
in this field for the first time. Teachers
who wish to specialize in primary
work will have an opportunity of
securing more complete training in
this field. This course will consist
of lectures, demonstrations and class
discussions. Special attention will be

given music, dramatization, story-
telling and games. Dr. Coffin of Cal-
gary will have general charge of the
instruction in this course.

To meet the needs of teachers who
may wish to further perfect them-
selves in oral French a course will
be given wholly in this language. Not
only will the course include practice
in speaking French, but will give con-
siderable training in method in teach-
ing the language with a careful study
of the texts in use in the schools.

For the first time this year teachers
have the opportunity of qualifying
for first class certificates at the
Summer Session. Three courses of
unusual interest are being offered—
one in Educational Psychology, one
in Administration and a third in Edu-
cational Problems. In these courses
the latest educational theories, de-
vices and practices will be explained
and discussed. Such work will be of
the greatest value to teachers who
wish to qualify as principals and vice-
principals.

Teachers this year are finding the
question, "What shall I do during the
vacation?" a difficult one. With the
majority of the men overseas the
women feel that they should engage
in some sort of war work. Realizing
that opportunities for this work are
of necessity limited during the sum-
mer, the Department through the
Summer School is offering opportuni-
ties of a varied character to the
teachers to further equip themselves
for a more efficient service at home.
Enrollment for the Summer Session
may be made at any time up to the
end of June.

It has always been the boast of the
Director that the quality of instruction
at the Summer Session has been one
of the highest character. This high
standard will be maintained during
the coming season. Several new
instructors have been secured whose
work will be both popular and of
great value.

Patience—"What makes that hen of
yours cackle so loudly?" inquired
Jenkins of his neighbor.

"Why, there's just laid a corn-
stone for the new Workmen's club
across the road, and she's trying to
make the neighbors think she did it."
—Chicago Herald.

Bager Lad—But what if your en-
gine stops in the air—what happens?
Can't you get down?

Aviator—That's just what appens,
mum. There's two Germans up in
France now with their engines stop-
ped. They can't get down; so they're
starvin' to death.—Policen.

Mrs. R. H. Mack, Mrs. R. R. Moffatt,
Miss E. Knight, and Mrs. W. C. Miller
have been appointed additional deputy
registrars for the town of Claresholm.

CALGARY EXHIBITION

There is a real treat in store for
those intending to visit the Calgary
Industrial Exhibition, June 28th to
July 8th. Never before have the in-
dications for a successful Exhibition
been better. The Fair will truly be
the show window of the best the
nation can produce. No one interest-
ed in live stock can possibly view the
wonderful displays of almost perfect
specimens without getting real en-
joyment and inspiration. The special
features arranged for the recreation
of visitors are the clearest of the
present day.

On Saturday, June 28th, Girls' and
Boys' Day, the girls' and boys' classes
will be judged, as well as the Short-
horns and Swine classes. On Monday,
July 1st, Dominion Day, pure bred
stallions will be judged as well as
Herefords, Holsteins and Sheep. On
Tuesday, July 2nd, United Farmers
and Angus and Ayrshires will be judged,
and there will also be a parade of
prize winning horses in the evening.
In front of the grandstand. Wednes-
day, July 3rd, Soldiers' Day, the heavy
draft and agricultural classes, Jersey
and Red Polls will be judged. Cattle
parade will also be held in the eve-
ning in front of the grandstand. There
will be horse races on the evenings of
June 28th to July 3rd inclusive, and
automobile races with the world's
greatest drivers, using special racing
cars, on the afternoons of July 4th
American Day, and July 5th, Auto
Day.

A free accommodation bureau will
be conducted by the Exhibition Com-
pany at the C.P.R. depot so that visi-
tors should have no difficulty in
getting accommodation.

Special arrangements have been
made to park automobiles on the
Exhibition grounds. An admission fee
of twenty-five cents per day will be
charged for cars, and they will be
checked free of charge. An extra fee
of twenty-five cents will be charged
if cars are left checked on the
Exhibition grounds over night.

Special illustrated folder giving in-
formation regarding the Exhibition
may be obtained by writing E. L.
Richardson, Manager of the Exhi-
bition, Calgary.

This Means U—Food conserva-
tion is necessary in this country, as
well as in England, where placards on
the wall read:

If U feast, U host U better;
If U feast, U host U better;
If U feast, U host U better;
I.O.D.E. NOTES

The regular monthly meeting of
the Potlatch Chapter, I.O.D.E. will be
held on Tuesday, June 25th, at 8 p.m.
in the Harrison Hall.

Make Money With Us in Oil!

WE ARE NOW DRILLING IN WYOMING

Warm Springs, Wyoming—Already one of the big producing
fields of the State. Twelve wells have been completed and for-
tunate stockholders are drawing big dividends every month in
this year. This is a "shallow" field and the drilling cost is at a mini-
mum. Through a peculiar turn of fortune the Van Duzen Co.
was able to secure a valuable lease on this structure. At least a
dozen companies are now drilling towards the oil producing
sands in the Warm Springs dome and we do not expect to lose
much time in starting our operations. Remember this is a pro-
ducing field.

Sundance-Upton Fields, Wyoming—We were in this field just
before the boom started and have 6,000 acres under lease on the
very apex of the structure. This dome bids fair to be one of the
best fields in this State and our large acreage will always make
this the big company of this big field. We are drilling in this
field.

Salt Creek, Wyoming—This is the most consistent oil pro-
ducing field in all the world, and although the field is but five years
old, it has made more wealthy people than any of the big fields of
Wyoming. The wide-awake men at the head of this
company have secured 320 acres of land less than a half mile from
one of the largest gushers in the field. One 500-barrel well in
this field at \$1.00 per barrel would mean 20 per cent. to the stock-
holders per annum on the total capitalization of the Van Duzen Oil Co.
We have room for 64 well on our property.

The Crazy Woman's Pocket, Montana—This dome has been
recognized by many geologists to be most perfect structure for an
oil reservoir in all of America. Two other companies have wells
in process of completion on this dome, and it is reported that one
of them has already encountered an oil producing sand. The
Van Duzen Oil Co. has secured 560 acres of deeded land midway
between the two wells now drilling. Our derrick is now in the
course of construction. When this field is proven it will be the
first producing field in Montana. Boom prices will prevail and
our stock is sure to go sky-high.

Powder River Junction, Wyoming—We have a one-third loca-
tor's interest in three one-quarter sections lying within a quarter
of a mile from a well now being drilled by the famous Ohio Oil
Co. This dome is looked upon as being one of the coming fields
of the State. Shallow drilling and its proximity to rail trans-
portation will make this field a big dividend payer.

An Uncommonly Sensible Car

The business-minded man
comes naturally to the Gray-
Dort as his car. The man who
weighs values—the man of
business—the man who looks
carefully to his investments—
to all of these the Gray-Dort
makes its greatest appeal.

Be fair to yourself—see the
Gray-Dort—ride in it—before
buying your car.

We rest our case on the
performance of the car itself
at that demonstration.

The smooth, quiet Gray-Dort Motor
lacks nothing in power and speed. It

represents the highest type of 4-cylinder
motor engineering. Every part is expertly
designed for the work it is to do.
The same is true of the chassis. Light weight
has been secured at no sacrifice of
strength. You will be pleasantly sur-
prised at the absence of trouble and re-
pairs with this light car.

The body, built in our own body-
plant, is the product of the finest coach-
builders. In beauty and comfort it yields
to none.

The Gray-Dort's cost of operation is
a vital item. Easy on tires and sparing
of gasoline, it gives you performance and
service at a minimum cost.

The models include a 5-passenger car;
3-passenger roadster; sedan; sedanet;
coupe.

The 5-passenger car is \$1,195, f.o.b.
Chatham.

Spring and creek, fenced and cross-
fenced. \$250 per acre.
This can be bought as a going concern
with 40 cattle, 6 horses and full line of
modern machinery. For terms and
particulars apply
JACK CORNELISEN,
Ranching P.O., Alberta.

NOTICE!

During the season my Thoroughbred

Percheron Stallion
"Chestnut"

formerly owned by N. G. Perry, will
stand at my barn, west of Economy
Barn, on

Thursday, Friday and Saturday
of each week. This horse is known to
be one of the surest foot gellers
and has lost some of the biggest and
best colts in the community.

14-1f **S. L. FRASER**

AT BANFF

The Homestead Hotel
opened on the 1st of May 1918. This
popular house with its big green
lawns is prepared to give better ser-
vice than ever before, 1917, being a
very successful year. It is the logical
home for car parties. Rates about
the same as last year. For further in-
formation phone 74, or write
15-1f JOHN LOCKE, Proprietor.

Motion Picture Fishing Voyage

The Canada Food Board is circulating
a film taken on board a Pacific
trawler from Prince Rupert, showing
how Pacific flatfish are caught and
handled, under the auspices of the
Board, for distribution in the Western
Provinces, as a reasonably priced sub-
stitute for meat.

**CHARLIE GOT IDEA FOR HIS NEW
COMEDY FROM GRATEFUL
PUP**

While waiting for his new studio
at Hollywood, Cal., to be erected,
Charlie Chaplin spent many days
rambling about the highways and by-
ways of the nearby city of Los An-
geles. During many of his aimless
expeditions into the Mexican quar-
ter, he saved a miserable white mongrel
pup from a cruel death that was
about to be provided for him by a
pack of sharp-toothed gutter hounds.
The pup showed his appreciation of
Charlie's kindness by following him
home and attaching himself to the
permanent studio staff. When it
became necessary to decide upon a
theme for his first \$1,000,000 comedy,
Charlie caged his brains for some
time until the pup forced itself upon
his attention by dragging one of the
distinctive comedian's famous shoes
out of his dressing room. Chaplin
decided upon the spot that the am-
bitious canine should be encouraged
in his longing for a histrionic career.
As a result, Charlie proceeded to
create a story in which the dog
should occupy a leading role. The
completed film will be shown at the
Fox Theatre in the near future, bearing
the title, "A Dog's Life."

"PEG O' MY HEART"

This charming comedy is coming
to Claresholm and will be presented
at the Rex Theatre on July 25 by the
United Producing Company. Everyone
knows this popular amusement com-
pany, and may be sure that they will
give a fine cast and charming stag-
ing of it. That they have picked the
members of the cast by their in-
telligence, physicality and temperamentally,
to the interest of their roles, is one
of the features that makes the per-
formance worth while. Belva Morrell
has been chosen to play the part of
"Peg," the Irish mad-cap, one of the
most fascinating dramatic creations
of modern times.

"Peg" comes out to England and
falls in love with a young man of an
English family of aristocratic rela-
tions with strict traditions. She
walks into the library with her shabby
travelling bag, and Shabby, the real
dog, under her arm.

It seems she was willing on the
Chichester by a relative just dead.
She is the daughter of a runaway
sister of the family, who married be-
neath her station and was sent out to
America. Peg has no advantages ex-
cept her poverty, which lets her see
something of life. Her Irish father,
whom she describes as the best man
in the world, gave her a quaint brogue
and her wit—but very little else ex-
cept her looks, which are quite out
of the ordinary.

The light and shades of contrast
between the conventional, prudish
cheer, and natural Peg, from the
basis of the humors situations in
fact. Peg falls in love with Sir
Gerard, a young Escottor of the Will
which has provided for Peg, whom
she gets to know under the name of
"Jerry." She makes a mistake in
a dance which she is forbidden to at-
tend, and afterwards stops her cousin
from running away with a married
man with whom she is infatuated.

Not a motion picture.

**HINDENBURG TRYING TO EX-
HAUST THE ALLIES**

With the French Armies in the
field, June 19.—Despite the four great
drives the Germans have undertaken
on the French front since March 21,
in which many divisions have been
engaged, two, three or four times,
Hindenburg is still jealously guarding
his untouched reserve divisions. It
is positively known that the German
high command plans repeated attacks
between the North Sea and the Cham-
pagne region, to kill off or wear out
the Allied reserves.

In the meantime the Germans seek
to advance their lines towards Paris
along the Marne and the Oise, until
they are convinced the Allied re-
serves are completely exhausted.
Then they will throw in their final
reserves absolutely. Continued ar-
rival of Americans can give the Al-
lied nations advantage in manpower
when the enemy plays his final trump.
This card is likely to be thrown down
within the next two months.

Guards Badly Battered

It is now established that the Ger-
man shock divisions ordered back
from repulse with the First Prussian
Guard—under orders to make a
serious American success, at any
cost—was the 25th division. This
division originally engaged May 27
on the Chemin des Dames, suffered
such losses in capturing Calonne
Plains and crossing the Aisne re-
gion, that the Kaiser personally pro-
mised it relief within three days.
The 26th, however, was ordered to
push southward as fast as possible.
Arriving at Jonquiere, it encountered
casualties that brought its losses of
effectives up to 25 per cent. When
finally ordered to the rear for re-
pose, its companies were reduced to
an average of sixty men.

A BETTER FARM GATE

That costs less than home-made gates

BETTER BECAUSE

—they always hang plumb and straight. They CAN'T SAG,
even one quarter of an inch.
—stock can't twist them out of shape. They are flexible but
almost indestructible.
—they weigh about one-half as much as ordinary allwood gates
but are stronger than steel, wire, or gas pipe gates.
—Large stock of these gates on hand and made up. All ready to
hang, including hinges. Look these over and get prices.
We will be figure your bill of material on anything you contemplate building.
